

# Bamboo

Sky Valley offers more standard combinations of door styles, wood species and colors than most other cabinet companies, and our custom options give you unmatched flexibility. We also offer a number of “green” cabinetry options, and you can order it all with fixed lead times of as little as four weeks...

Bamboo is one of the fastest growing plants on earth, and can be repeatedly harvested without being uprooted.

To turn grass into lumber, narrow strips are cut in a vertical (or quarter-sawn) manner, and laminated together. This creates a tight “grain” pattern with distinctive horizontal marks from leaf nodes on the stalk of the plant.

While a range of colors may appear on the same panel, Bamboo is generally a light blonde shade, and will golden or darken slightly over time.

Bamboo and Carbonized Bamboo are offered in our Euro custom frameless line, in a select palette of doors and stain colors.

**Carbonized Bamboo** shares all of the characteristics above, with the exception of color—pressure heating causes the sugars in the bamboo strands to change to a rich, dark amber or caramel shade. To showcase its beauty, we offer carbonized bamboo in a natural finish.
